### Dear Authors and readers

A Hearty welcome to all viewers on behalf of Pediatric infectious diseases: Open Access (PIDO). The PIDO is an open access journal for publication of peer reviewed scientific research articles and reviews on all Pediatric infections and diseases. The main aim of the journal is to provide the complete information related to all infectious diseases in children, infants and neonates and even focus on the current research related to the latest updates in immunization practices and laboratory methods.

The Pediatric infectious diseases: Open Access (PIDO) provides the wide range of information on all aspects of infections in the all Pediatric age group, which covers all immunological and phagocytic interactions, pathogenesis, epidemiology of infectious diseases and also deliberates regarding the infections of specific organ and organ systems which includes respiratory tract infections both upper respiratory tract infections and lower respiratory tract infections like bronchitis, pneumonia, influenza, croup, colds, sinusitis etc.,

infections of the heart; central nervous system infections like viral meningitis, rabies, encephalitis, poliomyelitis, measles etc., Sexually transmitted diseases; genitourinary tract infections like jaundice; gastrointestinal tract infections like Cholera, Shigellosis etc. other intra-abdominal infections: Open Access (PIDO) ; liver diseases like hepatitis; Skin and soft tissue infections; Bone and joint infections; skin infections; ocular infections; systemic infectious diseases; infections of the foetus and new-born. Pediatric infectious diseases journal provides the latest insights on combating disease in children; it includes all the diagnostic techniques to the most effective drug therapies and other treatment protocols. It is a resource for all the practitioners who care their patients and provides wide range of information for all researchers, scientists and scholars for their personal research.

Lastly I would like to wish all the Authors and readers to encourage and increase the scope of the journal by contributing your valuable research submission and enlighten the knowledge globally.
