

## Challenges of nursing in pediatric surgery

Amin Gohary

Burjeel Hospital, UAE

### Abstract

Nursing is one of the growing sectors in the field of Medicine, Where Pediatric Surgery Interventions and its Implications plays the most Prominent role. Pediatric surgery is the only specialty that coins with age. Other specialties deal with system (urology, neurology etc). In this presentation I would discuss common pediatric surgical problems and the role of nursing in the overall management. The role of nursing in pre and post-operative care is discussed. The nurse should be an integral part of the baby care and should contribute positively to welfare of the child and their families. The role played by these nurses in patient care is highlighted
